

Fund Objective

The objective of the Autus Prime Diversified Fund is to provide investors with access to a diversified pool of assets in order to achieve consistent capital growth over the medium to long term.

Risk Profile*

Low	Low - Medium	Medium	Medium - High	High
-----	--------------	--------	---------------	------

Portfolios in this category are tilted towards a high level of capital growth assets (equities) with reduced allocation to income generating assets (bonds). Due to the higher allocation to equities within these portfolios, the investment returns generated will be mostly of a capital nature. Statistical analyses of markets' returns indicate that investments in these portfolios have a high probability of producing inflation-beating returns over a medium to long-term investment horizon (5-10 years plus).

General Fund Information

Investment Manager	Autus Fund Managers (Pty) Ltd
Classification	South African MA High Equity
Benchmark	ASISA Category Average
Fund Inception Date	2018/09/25
Domicile	South Africa
Base Currency	Rand
Fund Size	R 167 451 867
Fund Size Date	2023/09/29
JSE Code	APGDA
ISIN Number	ZAE000261905
NAV Price (Month-End)	R 1,27
Income Distribution	Semi-Annually
Distribution Payment	3rd working day of March / September
Valuation Time	10:00
Transaction Cut-off	14:00
Regulation 28 Compliant	Yes
Issue Date	30 September 2023

Distributions

Last Distribution Date	09/2023	03/2023	09/2022
Last Distribution (Rand per unit)	0,026	0,031	0,023

Fund Universe

The portfolio will invest in a combination of assets in liquid form, money market instruments, interest bearing instruments, bonds, debentures, corporate debt, equity securities, property securities, preference shares, convertible equities, derivatives and non-equity securities as well as listed and unlisted financial instruments

Investment Strategy

In order to achieve its objective, the portfolio will at all times invest a minimum of 75% of its net asset value in portfolios of collective investment schemes which are not managed by the same investment manager and which are consistent with the portfolio's investment policy. The composition of the fund shall reflect the investment structure of retirement fund with an aggressive risk profile and is compliant with the prudential guidelines to the extent allowed by the Act.

Who should be investing

These portfolios are often suited to individuals who are half way to their retirement and who can afford shorter term volatility in order to produce higher long term returns.

Fee Structure

Total Expense Ratio (TER)	0,97%
Transaction Costs (TC)	0,21%
Investment Management Fee	0,46%
Initial Fee	N/A
Total Investment Charges (TIC)	1,18%

Glossary of Terms

Standard Deviation is a statistical measure of the dispersion of returns for a given security or market index.

Sortino Ratio measures the risk-adjusted return of an investment asset, portfolio, or strategy. It is a modification of the Sharpe ratio but penalizes only those returns falling below a user-specified target or required rate of return, while the Sharpe ratio penalizes both upside and downside volatility equally.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk.

Max Drawdown is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained. Max drawdown is an indicator of downside risk over a specified time period.

Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and the Transaction Costs (TC).

Total Expense Ratio (TER) is the global standard used to measure the impact that the deduction of management and operating costs has on a fund's value. It gives you an indication of the effects these costs have on the future growth of your investment portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Also, the current TER may not necessarily be an accurate indication of future TERs.

Transaction Costs (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.

Quarterly Commentary

Inflation, the number one enemy of central banks globally, has declined. The debate is whether interest rates will be kept at the current high levels for longer or will central banks start to ease the burden of higher finance costs that is constraining consumers and choking economic growth. The SA Reserve Bank kept its repo-rate unchanged at 8.25% at the September meeting. The Reserve Bank Governor struck a hawkish tone, hinting at the possibility of another interest rate hike should the inflation rate not decline to the lower end of the 4-6% inflation target range. August's y/y headline inflation was 4.8% from 4.7% in July. Food inflation continued its decline but was countered somewhat by higher contributions from housing and utilities and, to a lesser extent, transport. Prevailing high oil prices and a weak Rand pose headwinds for the inflation fight. Economists expect average inflation of 5.5% in 2023. The South African economy grew by 0.6% q/q seasonally adjusted in the second quarter, up from 0.4% q/q in 1Q23. Compared to the same period last year, the economy has expanded by 1.6%. The World Bank expects the SA economy to grow by 0.5%, hindered by recurring load shedding and transportation challenges.

The global economic outlook remained uncertain, with the US showing resilience while China and much of Europe reporting disappointing economic data. US, UK, and European bond yields have risen appreciably over the quarter as investors price in higher levels of economic uncertainty. Consequently, borrowing costs for governments have increased, which could have ripple effects throughout economies, impacting mortgage and loan rates and causing concerns in equity markets. The US dollar has strengthened against other currencies in response. In developing economies, some regions had already entered a rate-cutting cycle. Brazil's central bank cut its rates by 50bp, following the lead of Chile, Costa Rica, and Uruguay in recent months. China also lowered interest rates in August, becoming the second out of 18 developing economy central banks to do so. However, other developing nations faced currency weakness and persistently high inflation, leading them to raise rates instead.

The fund's total equity exposure grew to 74% over the quarter. The allocation to global equities remained at 45%, while the local equity exposure increased to 29%. The bond allocation, which consists primarily of government bonds, was stable at 23%. Our total cash exposure decreased to 3% at the end of the quarter. We remain cautiously positioned due to high market uncertainty and weak economic data; however, our sufficient cash exposure will allow us to exploit opportunities.

Disclaimer

This is a minimum disclosure document and a general investor report. Collective Investment Schemes are generally medium to long term investments. The value of the participatory interests may go down as well as up. The manager does not provide any guarantee either concerning the capital or the return of a portfolio. Past performance is not necessarily an indication of future performance. CIS's are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to other charges. The co-named funds (as defined in BN 778 of 2011) are registered under the Prime Collective Investment Scheme, managed by Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd ("the manager") (Registration No. 2005/017098/07), a registered Collective Investment Schemes Management Company in terms of the Collective Investment Schemes Control Act 45 of 2002, supervised by the Financial Sector Conduct Authority ('FSCA'). The manager takes full responsibility for the co-named portfolio, regardless of any co-naming arrangements. Autus Fund Managers (Pty) Ltd (FSP No: 4221) is the FSCA approved and appointed investment manager of the co-named CIS funds situated at D2, Polo Village Offices, Val de Vie Estate, Paarl and is authorised as a Financial Services Provider. A schedule of charges and maximum commissions is available on request from the manager. According to their mandates, the manager has a right to close portfolios to new investors to manage them more efficiently. Commission and incentives may be paid and, if so, will be included in the overall costs. Forward pricing is used. The manager may borrow up to 10% of the portfolio's market value to bridge insufficient liquidity. Income is reinvested on the reinvestment date. The Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Dealing prices are calculated on a net asset value, and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance is calculated for the portfolio. The individual investor performance may differ due to initial fees, the actual investment date, the date of reinvestment, and dividend withholding tax. Income distributions are included in performance calculations before deduction of applicable taxes. Fund of funds invests in funds of collective investment schemes that levy their charges, resulting in a higher fee structure for the Fund of Funds. Performance numbers and graphs are sourced from Morningstar. NAV to NAV figures have been used. Investment performance is for illustrative purposes only. Investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the exact amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual date of reinvestment. The risk profile of the Fund ranges from low risk to high risk, with a low risk potentially associated with lower rewards and high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. Certain investments, including futures, options, equity swaps, and other derivatives, may give rise to substantial risk and might not be suitable for all investors. The daily cut off time is 14:00 for trades, and the valuation point is 22:00 daily. Prices are published on Finswitch by 10:00 daily. One can also obtain additional information on Prime Investments products on the Prime Investments website, and all price related queries or information is readily available on request. Prime Collective Investment Schemes Management (RF) (Pty) Ltd is a registered Collective Investment Scheme Manager in terms of Section 5 of the Collective Investment Schemes Control Act and is a wholly-owned subsidiary of Prime Financial Services (Pty) Ltd a member of ASISA.
