

Fund Objective

The Autus Prime Opportunity Fund is a flexible portfolio that aims to provide investors with high long-term capital growth.

Risk Profile*

Low	Low - Medium	Medium	Medium - High	High
-----	--------------	--------	---------------	------

Portfolios in this category are tilted towards a high level of capital growth assets (equities) with reduced allocation to income generating assets (bonds). Due to the higher allocation to equities within these portfolios, the investment returns generated will be mostly of a capital nature. Statistical analyses of markets' returns indicate that investments in these portfolios have a high probability of producing inflation-beating returns over a medium to long-term investment horizon (5-10 years plus).

General Fund Information

Investment Manager	Autus Fund Managers (Pty) Ltd
Classification	South African MA Flexible
Benchmark	ASISA Category Median
Fund Inception Date	2007/04/04

Distributions

Last Distribution Date	09/2026	03/2026	09/2025
Last Distribution (Rand per unit)	0,023	0,027	0,015

Fund Universe

The portfolio may diversify across all asset classes, although a high exposure to equities will be typical during normal market conditions. The portfolio focusses predominantly on stock selection considering companies, business models and management teams which offers investors the opportunity of real growth given prevailing trends in the macro-economic environment. The manager may invest in unlisted investments from time to time, as well as in participatory interests in other collective investment schemes which are consistent with the portfolio's investment policy.

Investment Strategy

The portfolio may from time to time invest in listed and unlisted financial instruments, in accordance with the provisions of the Act, and the Regulations thereto, as amended from time to time, in order to achieve the portfolio's investment objective. The manager may include forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes. The manager shall have the maximum flexibility to vary assets between the various asset classes to reflect the changing economic and market conditions.

Who should be investing

These portfolios are often suited to individuals who are half way to their retirement and who can afford shorter term volatility in order to produce higher long term returns.

Fee Structure

Total Expense Ratio (TER)	2,60%
Transaction Costs (TC)	0,18%
Service Fee	1,32%
Initial Fee	N/A
Total Investment Charges (TIC)	2,78%

The TER above is as of 30 June 2026

*All fees are annualised and include 15% Value Added Tax (VAT). **Performance Fee:** 15% of outperformance above the benchmark applies. This fee is calculated over a rolling two-year period and capped at a max of 0.75% p.a.*

Glossary of Terms

Standard Deviation is a statical measure of the dispersion of returns for a given security or market index.

Sortino Ratio measures the risk-adjusted return of an investment asset, portfolio, or strategy. It is a modification of the Sharpe ratio but penalizes only those returns falling below a user-specified target or required rate of return, while the Sharpe ratio penalizes both upside and downside volatility equally.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk.

Max Drawdown is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained. Max drawdown is an indicator of downside risk over a specified time period.

Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and the Transaction Costs (TC).

Total Expense Ratio (TER) is the global standard used to measure the impact that the deduction of management and operating costs has on a fund’s value. It gives you an indication of the effects these costs have on the future growth of your investment portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Also, the current TER may not necessarily be an accurate indication of future TERs.

Transaction Costs (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.

Up Period Percent is number of months above 0 divided by the total number of months.

Quarterly Commentary

The South African operating environment during the first half of 2026 was mixed. Real GDP growth surprised on the upside in the first quarter, expanding by 0.5% quarter-on-quarter, supported by strong contributions from the finance, agriculture, domestic trade, and transport sectors, as well as an improved net trade position. However, domestic demand contracted due to lower inventories, weaker fixed investment, and slower consumer spending. GDP growth for 2026 between 1.0% and 1.3% is expected, down from the 1.5% forecast at the start of the year. Higher fuel prices pushed inflation from 3.0% in February to 4.5% in May. In response, the South African Reserve Bank's (SARB) Monetary Policy Committee increased interest rates by 25 basis points in May, taking the prime lending rate to 10.5%. Inflation is expected to peak at around 4.6% in June before easing to approximately 3.2% by year-end, supported by lower oil prices as prospects for a truce between the United States and Iran improve and shipping flows through the Strait of Hormuz increase. South Africa's credit profile improved during the period, with S&P and Fitch upgrading the country's sovereign ratings, while Moody's affirmed its rating and revised the outlook to positive. These actions reflect a more credible fiscal trajectory and progress on structural reforms.

Over the past six months, the global economy has been shaped by heightened geopolitical tensions, disruptions to oil markets and trade flows, and increased investor uncertainty. These developments have raised inflation expectations, altered interest-rate outlooks, and weighed on growth forecasts. In response, some central banks have tightened monetary policy, resulting in weaker consumer confidence. While the United States and parts of Asia remained relatively resilient, Europe and other regions experienced slower growth. Emerging markets faced additional pressure from higher input costs, tighter financial conditions, and capital-flow volatility. The US economy grew by an annualised 2.0% in the first quarter of 2026, supported by investment in artificial intelligence and government spending. The first Federal Reserve meeting under new Chair Kevin Warsh marked the beginning of a more hawkish and inflation-focused leadership approach. Although rates remained unchanged, the Fed removed language suggesting future rate cuts and reinforced its commitment to price stability, signalling a firmer stance on inflation and less reliance on forward guidance.

Throughout the second quarter, the fund's total equity exposure decreased to 70%. Bond holdings increased to 19%, as they continue to provide stability through a core allocation to government instruments. Property exposure remained consistent at 2%, while the balance of the portfolio was held in cash. Despite ongoing market uncertainty, we remain constructive in our positioning, with sufficient liquidity to act on compelling opportunities.

Disclaimer

This is a minimum disclosure document and a general investor report. Collective Investment Schemes are generally medium to long term investments. The value of the participatory interests may go down as well as up. The manager does not provide any guarantee either concerning the capital or the return of a portfolio. Past performance is not necessarily an indication of future performance. CISs are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to other charges. The co-named fund (as defined in BN 778 of 2011) is registered under the Prime Collective Investment Scheme, managed by Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd ("the manager") (Registration No. 2005/017098/07), a registered Collective Investment Schemes Management Company in terms of the Collective Investment Schemes Control Act 45 of 2002, supervised by the Financial Sector Conduct Authority ('FSCA'). The manager takes full responsibility for the co-named portfolio, regardless of any co-naming arrangements. Autus Fund Managers (Pty) Ltd (FSP No: 4221) is the FSCA approved and appointed investment manager of the co-named CIS fund and is situated at D2, Polo Village Offices, Val de Vie Estate, Paarl and is authorised as a Financial Services Provider. A schedule of charges and maximum commissions is available on request from the manager. According to their mandates, the manager has a right to close portfolios to new investors to manage them more efficiently. Commission and incentives may be paid and, if so, will be included in the overall costs. Forward pricing is used. The manager may borrow up to 10% of the portfolio's market value to bridge insufficient liquidity. Income is reinvested on the reinvestment date. The Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Dealing prices are calculated on a net asset value, and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance is calculated for the portfolio. The individual investor performance may differ due to initial fees, the actual investment date, the date of reinvestment, and dividend withholding tax. Income distributions are included in performance calculations before deduction of applicable taxes. Performance numbers and graphs are sourced from Morningstar. NAV to NAV figures have been used. Investment performance is for illustrative purposes only. Investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the exact amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual date of reinvestment. The risk profile of the Fund ranges from low risk to high risk, with a low risk potentially associated with lower rewards and high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. Certain investments, including futures, options, equity swaps, and other derivatives, may give rise to substantial risk and might not be suitable for all investors. The daily cut off time is 14:00 for trades, and the valuation point is 15:00 daily and 17:00 at month end. Prices are published on Finswitch by 10:00 daily. One can also obtain additional information on Prime Investments products on the Prime Investments website, and all price related queries or information is readily available on request. Prime Collective Investment Schemes Management (RF) (Pty) Ltd is a registered Collective Investment Scheme Manager in terms of Section 5 of the Collective Investment Schemes Control Act and is a wholly owned subsidiary of Prime Financial Services (Pty) Ltd a member of ASISA. This document should not be construed as advice or guidance in any form whatsoever. Investors should take cognisance of the fact that there are risks involved in buying or selling any financial product and are encouraged to obtain independent professional investment and taxation advice. Opinions expressed in this document may be changed without notice at any time after publication.
