

Fund Objective

The Autus Prime Worldwide Flexible Fund aims to maximise total return for its investors by way of a flexible portfolio actively investing across different qualifying asset classes in South Africa as well as abroad.

Risk Profile*

Low	Low - Medium	Medium	Medium - High	High
-----	--------------	--------	---------------	------

Portfolios in this category are blended solutions of capital growth and income generating assets with a tilt towards equities. Due to the balanced allocation across asset classes within these portfolios, the investment returns generated will be both of a capital and of an income nature. This portfolio is suitable for medium to long term investment horizons (5-10 years) and in statistics have a high probability of being able to generate stable inflation beating capital growth over the longer term whilst providing some income distribution.

Fund Universe

The portfolio may invest in global and local equity securities, government, corporate and inflation-linked bonds, debentures, property shares, preference shares, money market instruments and assets in liquid form. The manager may invest in unlisted investments from time to time, as well as in participatory interests in other collective investment schemes which are consistent with the portfolio's investment policy. Where such schemes are operated outside South Africa, they will only be included if the relevant regulatory environment provides investor protection at least equal to that prevalent in South Africa.

Investment Strategy

The portfolio may also include participatory interests and other forms of participation in portfolios of collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and the trustee and is of a sufficient standard to provide investor protection at least equivalent to that in South Africa and which is consistent with the portfolio's primary objective. The portfolio may from time to time invest in listed and unlisted financial instruments, in accordance with the provisions of the Act, and the Regulations thereto, as amended from time to time, in order to achieve the portfolio's investment objectives. The manager may include forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.

Who should be investing

These portfolios are suitable for medium to long term investment horizons (5-10 years) and in statistics have a high probability of being able to generate stable inflation beating capital growth over the longer term whilst providing some income distribution. These portfolios are often suited to middle-aged individuals who are more than 10 years from retirement.

Fee Structure

Total Expense Ratio (TER)	2,70%
Transaction Costs (TC)	0,13%
Service Fee	1,32%
Initial Fee	N/A
Total Investment Charges (TIC)	2,83%

The TER above is as of 30 June 2026

All fees are annualised and include 15% Value Added Tax (VAT).

Glossary of Terms

Standard Deviation is a statical measure of the dispersion of returns for a given security or market index.

Sortino Ratio measures the risk-adjusted return of an investment asset, portfolio, or strategy. It is a modification of the Sharpe ratio but penalizes only those returns falling below a user-specified target or required rate of return, while the Sharpe ratio penalizes both upside and downside volatility equally.

Sharpe Ratio is a measure for calculating risk-adjusted return. It is the average return earned in excess of the risk-free rate per unit of total risk.

Max Drawdown is the maximum loss from a peak to a trough of a portfolio, before a new peak is attained. Max drawdown is an indicator of downside risk over a specified time period.

Total Investment Charge (TIC) is the sum of the Total Expense Ratio (TER) and the Transaction Costs (TC).

Total Expense Ratio (TER) is the global standard used to measure the impact that the deduction of management and operating costs has on a fund’s value. It gives you an indication of the effects these costs have on the future growth of your investment portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Also, the current TER may not necessarily be an accurate indication of future TERs.

Transaction Costs (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available.

Up Period Percent is number of months above 0 divided by the total number of months.

South Africa's economy contracted by 0.2% quarter-on-quarter in the second quarter of 2026, after growth of 0.4% in the first quarter (revised from 0.5%), with mining, trade and manufacturing the main drags. The SARB now expects growth of 1.2% for 2026 (previously 1.4%). Headline inflation edged up to 4.4% in August from 4.3% in July, above the SARB's 3% target and the upper end of its 2% to 4% tolerance band, driven by fuel and services inflation, while food inflation remains very low. With inflation expected to exceed 5% later in 2026 and early 2027 before moderating, the SARB raised the repo rate by 25 basis points to 7.25% in September, its second increase this year, taking the prime lending rate to 10.75%. The decision was unanimous.

The global economy has remained more resilient than initially feared, with the IMF projecting growth of 3.0% in 2026 and 3.4% in 2027. Technology and artificial intelligence investment is supporting economies linked to the global technology cycle, while the Middle East conflict and higher energy costs weigh on energy importers and have stalled progress in reducing inflation. Major central banks have turned more restrictive: in September the US Federal Reserve raised its target range by 25 basis points to 3.75%-4.00% and the European Central Bank increased its deposit rate by 25 basis points to 2.50%. China's economy remains uneven, with industrial production up 5.2% year-on-year in August but retail sales up only 0.4% and fixed-asset investment down 7.2% over the first eight months of 2026.

Global equities remained resilient despite higher rates and geopolitical uncertainty. The S&P 500 closed the quarter at 7,651.54, approximately 11.8% higher for the year and 2.0% higher since the end of June. Locally, the FTSE/JSE All Share Index closed the quarter at approximately 108,507, around 1.6% lower than at the end of June, after a sharp September sell-off led by a correction in gold and platinum group metal prices. Higher domestic rates support income from cash and bonds, although bond prices remain sensitive to inflation and global yields. The rand ended the quarter at around R16.42 to the US dollar, broadly unchanged from end-June and approximately 5% stronger than a year earlier, which reduces the rand-denominated return on unhedged offshore investments. Diversification across local and global asset classes remains central to portfolio construction rather than attempting to time short-term market or currency movements. Key risks include further energy-price shocks, persistent inflation, interest rates remaining higher for longer and renewed currency volatility.

Throughout the third quarter, the fund's overall equity exposure increased to 49%, with local equities increasing to 10% and global equities increasing to 40%, as cash holdings were deployed. Bond exposure increased to 44%, with the allocation remaining primarily focused on government instruments to provide stability amid ongoing geopolitical uncertainty. Property holdings remained consistent at 2%, while the balance of the portfolio was held in cash. Despite continued volatility, we remain measured in our approach, with sufficient liquidity to capture attractive opportunities.

Disclaimer

This is a minimum disclosure document and a general investor report. Collective Investment Schemes are generally medium to long term investments. The value of the participatory interests may go down as well as up. The manager does not provide any guarantee either concerning the capital or the return of a portfolio. Past performance is not necessarily an indication of future performance. CISs are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to other charges. The co-named fund (as defined in BN 778 of 2011) is registered under the Prime Collective Investment Scheme, managed by Prime Collective Investment Schemes Management Company (RF) (Pty) Ltd ("the manager") (Registration No. 2005/017098/07), a registered Collective Investment Schemes Management Company in terms of the Collective Investment Schemes Control Act 45 of 2002, supervised by the Financial Sector Conduct Authority ('FSCA'). The manager takes full responsibility for the co-named portfolio, regardless of any co-naming arrangements. Autus Fund Managers (Pty) Ltd (FSP No: 4221) is the FSCA approved and appointed investment manager of the co-named CIS fund and is situated at D2, Polo Village Offices, Val de Vie Estate, Paarl and is authorised as a Financial Services Provider. A schedule of charges and maximum commissions is available on request from the manager. According to their mandates, the manager has a right to close portfolios to new investors to manage them more efficiently. Commission and incentives may be paid and, if so, will be included in the overall costs. Forward pricing is used. The manager may borrow up to 10% of the portfolio's market value to bridge insufficient liquidity. Income is reinvested on the reinvestment date. The Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Dealing prices are calculated on a net asset value, and auditor's fees, bank charges and trustee fees are levied against the portfolios. Performance is calculated for the portfolio. The individual investor performance may differ due to initial fees, the actual investment date, the date of reinvestment, and dividend withholding tax. Income distributions are included in performance calculations before deduction of applicable taxes. Performance numbers and graphs are sourced from Morningstar. NAV to NAV figures have been used. Investment performance is for illustrative purposes only. Investment performance is calculated after taking the actual initial fees and all ongoing fees into account. The reinvestment of income is calculated on the exact amount distributed per participatory interest by using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual date of reinvestment. The risk profile of the Fund ranges from low risk to high risk, with a low risk potentially associated with lower rewards and high risk with potentially higher rewards. Foreign securities may be included in the portfolio from time to time and as such may result in the following: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks and potential limitations on the availability of market information. Certain investments, including futures, options, equity swaps, and other derivatives, may give rise to substantial risk and might not be suitable for all investors. The daily cut off time is 14:00 for trades, and the valuation point is 15:00 daily and 17:00 at month end. Prices are published on Finswitch by 10:00 daily. One can also obtain additional information on Prime Investments products on the Prime Investments website, and all price related queries or information is readily available on request. Prime Collective Investment Schemes Management (RF) (Pty) Ltd is a registered Collective Investment Scheme Manager in terms of Section 5 of the Collective Investment Schemes Control Act and is a wholly owned subsidiary of Prime Financial Services (Pty) Ltd a member of ASISA. This document should not be construed as advice or guidance in any form whatsoever. Investors should take cognisance of the fact that there are risks involved in buying or selling any financial product and are encouraged to obtain independent professional investment and taxation advice. Opinions expressed in this document may be changed without notice at any time after publication.
